Muhammad Nadeem

Frontend Developer (Recat Js, HTML, CSS, Bootstrap)

1year(s) work experience

PROFILE SUMMARY

My name is Muhammad Nadeem and I am a Frontend Developer with 1 year of experience. I have developed web applications using React JS, HTML, CSS, and Bootstrap technologies. My expertise lies in creating user-friendly websites that are visually appealing and highly responsive. Additionally, I have extensive knowledge in developing mobile applications for Android and iOS platforms. With my ability to troubleshoot complex coding issues quickly, I can ensure the highest quality product delivery within tight deadlines. In addition to this, I possess excellent communication skills which help me collaborate effectively with other team members while working on projects.

WORK HISTORY

Intern Pakistan - Frontend Developer

JOB PROFILE

1. During my first year as a Frontend Developer at Intern Pakistan, I had the opportunity to develop and maintain various websites using HTML/CSS, JavaScript, jQuery and Bootstrap. My main tasks included developing user interfaces for web applications, creating responsive designs for mobile devices and troubleshooting any issues that arose from coding or styling. I was also responsible for ensuring the quality of all code produced by my team members.

2. At Intern Pakistan, I worked closely with teams across different departments such as design, marketing and product development to ensure our projects were completed on time and up to standards set by the company's management. As part of my job responsibilities, I learned how to use frameworks like ReactJS in order to create more efficient front-end solutions for our clients' needs.

3. During my tenure at Intern Pakistan, I gained valuable experience working with various CMS platforms such as WordPress and Drupal which enabled me to build custom websites quickly while adhering strictly to industry best practices in terms of security protocols and website performance optimization techniques. Additionally, I took part in several workshops which helped me hone my skills further when it came down to coding dynamic user interfaces that were both visually appealing yet highly functional too!

JOB RESPONSIBILITIES

1. Proven track record of developing interactive, user-friendly websites and applications using React JS, HTML, CSS, and Bootstrap.
2. Experienced in creating fully responsive web designs that are compatible with multiple browsers and devices.
3. Excellent understanding of JavaScript programming principles to create dynamic elements on the website or application pages.
4. Skilled in debugging web applications for optimal performance and troubleshooting any issues that arise during development process.
5. Ability to work collaboratively with a team of software developers to ensure successful completion of projects according to timeline provided by clients/stakeholders .
6. Adept at optimizing existing codebase for better performance as well as implementing modern coding practices such as AJAX calls or API integrations when needed .
7. Knowledgeable about best practices related to page loading speed optimization which helps improve overall user experience on the website or application . 8 Familiarity with version control systems like Git/Github for tracking code changes throughout the development cycle & effective collaboration among team members.. 9 Highly organized individual who is able to multitask efficiently while paying close attention even small details during development process 10 Passionate about keeping up-to-date with latest trends in frontend technologies & applying them accordingly when necessary
